UI Design and Prototyping Report Template

Project Title :   Nature Guardians(lets make our home planet a better place for all life's)

1. Introduction

Give a brief introduction to your project and the list of features. Summarize in a few sentences what you proposed in the ideation report.

website for a charity organisation called Nature Guardians   whose aim is to make engagge the whole global community with different   programmes like raising   the funding for plantation programme in different regions all over the globe by our volunteer or make efforts in order to conserving wild   life , protect animals to be hunted etc. This type events are   orgaininised on monthly basis by this Orgainisation for the conservation of nature and   our wildlife. So.   join organisation as a volunteer and be a change protect earth protect human.

The role of this website is to make a platform where the people can join as a volunteer and share his stories like what they are doing on best of their basis for the   conservation of our ecosystem, different other organisations and ngo's can come and request for raising funding for their motivation and   make people familiar   about how much extent now its require to give a thought on the conservation of our ecosystem by each and every people who are breathing on this earth.

2. User Interface Design and Prototype

Give some sample user interface layouts for your application. You can use either wireframe diagrams or prototyping tools to construct the mock representations of your UI design

UI prototype link is provided   you after this report so that you can understand the flow of this website for this i use a platform called figma. please find the link

https://www.figma.com/file/90C5jSw25WnootC9f7NGUA/first-Capstone-Project?node-id=0%3A1

Briefly explain the rationale behind designing your UI and how it is geared towards supporting the list of features for your application.

This website is dedicated for nature and wildlife conservation here are list of feature provided by this   website:

Users can volunteer us by filling a form at footer section.

For Raising funds apply by an NOG's or Charity trust.

Any user and our volunteer can donate in a current running programme.

Get some knowledge with a link for information given about endangered species.

3. Navigation Structure

Give a brief overview of the navigation structure for your application.

Navigation Bar holds five buttons to move in different dimensions of the website i.e, Home , join as a volunteer , our impact, news & events,   about us, Home is for simply go back to the main section of the website. Second button in navigation menu is for story where volunteers share his achievaments and thoughts that are relevent to the welfare of nature and wildlife.   Third button in navigation menu provide you a page link by which you will redirect to a page holds achievments of our orgainsation so far   then you find news and events page button in this page website manager manually adds   global news and orgainisation upcoming   to be programmes regularly that revelent to the moto of the website and finally at last the about us page show you the details of the founding members of the nature guardians orgainisation beside this navigation menu there are other our social media links and   three buttons for   users to donate in a programme on a click of donate button redirect you to current charity pprogramme where you can donate , another button called apply button for donation called Raise funds. and at last the green button   join as volunteer button move you at the bottom called footer of the homepage where you find a form for to be a volunteer and for recieving mails from the orgainisation
